### Abstract

As with all BRIC countries, the Brazilian office document technology market will see sustained growth despite the recent downturn in the global economy. In fact, ODT revenues are projected to exceed \$2.8 billion by 2012, making this market a fresh source of revenue for what is a maturing industry in other parts of the world.

Emerging market end-user customer beliefs, values, behaviors, and buying patterns differ dramatically from mature markets. Understanding these differences is critical to sustaining business growth. Brazil has its own unique idiosyncrasies ranging from governmental regulations to the purchasing requirements of end-user customers. InfoTrends believes that its combined research provides an objective view of the market opportunity in Brazil.

This study is designed to provide insight into these cultural variations as well as a comprehensive view of the ODT market in Brazil, highlighting opportunities for solutions, hardware, and supplies vendors as well as resellers and distributors. In addition to evaluating the current state of Brazil's ODT industry, we have developed forecasts through 2012 consistent with our existing ODT industry forecasts for digital peripherals, communication supplies, and document solution software.

Our Russia, India, China, and BRIC overview surveys are available as separate documents.

## Project Objectives

This study is the first in a series of emerging market research projects for the Office Document Technology industry. It addresses the following key objectives:

- Develop a clear understanding of the size, nature, and future growth potential for copiers, printers, as well as associated document services and supplies
- Profile and evaluate end-user<sup>1</sup> acquisition and usage behaviors associated with office document technologies
- Evaluate emerging market trends and dynamics
- Generate placement, installed base, forecast, and trend analysis

## Methodology

On October 28, 2008, InfoTrends launched a survey to end-users in Brazil, Russia, India, and China (BRIC). The survey was translated into Portuguese, Russian, Hindi, and Mandarin so that respondents were able to take the survey in their native language. Responses were collected through December 2008.

InfoTrends received a total of 306 qualified responses from Brazil, 303 from Russia, 302 from India, and 303 from China. To qualify for participation in this survey, respondents were required to authorize or approve purchases of office equipment, make the final decision about these purchases, or provide recommendations or input to the final decision-maker. Respondents who were not involved in this manner were disqualified.

This study involved a combination of research activities, including:

- A telephone-delivered structured survey
- In-depth interviews with end-users, vendors, channels, and government regulatory agencies
- Market forecasts from InfoTrends' Digital Peripherals Solutions, Communication Supplies, and Network Document Solutions Consulting Services

This material is prepared specifically for clients of InfoTrends, Inc. The opinions expressed represent our interpretation and analysis of information generally available to the public or released by responsible individuals in the subject companies. We believe that the sources of information on which our material is based are reliable and we have applied our best professional judgment to the data obtained.
