Introduction

The upcoming drupa event will have many new inkjet-based product announcements. The objective of this report is to provide a brief summary of some of the key product announcements and pre-drupa activities. There will be more inkjet-based products introduced that are covered by non-disclosure agreements, but we wanted to provide a look at these pre-drupa announcements because there are two important product themes developing among many of the print head and technology suppliers – wider arrays that enable very fast, single-pass printing and the development of print modules that allow integrators to quickly implement these print technologies.
