Abstract

Smart Chips Revisited: 2009

Report Fast Facts

Published: October 2009

Pages: 53

Tables & Figures: 23

Price: \$3,999

Purchase also includes excel file with a database of chips by product and aftermarket options available

Order Information

Abstract

Smart Chips continue to evolve and catch the interest of all levels of the industry. While chip availability is easier, it is a constant technology struggle as the OEMs continue to enhance the technology and features provided by the chips and the aftermarket continues to seek ways to keep pace with them. This report is an update of a report published in 2003 with details on the printer vendors' activities in chips, the aftermarket, and chip manufacturers. A separate Excel file has a database of chips by product and aftermarket options available.
