Abstract

This document takes a closer look at the results of InfoTrends' research report entitled *2009 U.S. Social Network and Photo Sharing Survey* to place a special focus on teenagers and young adults (respondents between the ages of 13 and 24). This report examines the social networking and photo sharing activities of those under age 25. Where appropriate, the teenagers' and young adults' responses are separated by gender and/or compared to those of the total survey population to further illuminate the differences between these groups.
